### **DETAILED ACTION**

The response filed December 4, 2007 has been entered. Claims 1-11 are allowed.

#### ***Allowable Subject Matter***

Claims 1-11 are allowed. The following is an examiner's statement of reasons for allowance: The arguments presented in the response are persuasive. Moreover, in regard to the rejection under 35 USC 102, Bolz et al. do not disclose when the isolation of the batteries occurs. Although the batteries can be isolated at some unspecified time, the disclosure does not suggest that this isolation occurs specifically upon or during start of the internal combustion engine. Furthermore, the additional cited art does not suggest that the batteries in the type of system disclosed by Bolz et al. could or should be isolated at engine start. Thus, the claimed isolation of the batteries upon or during engine start is not obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
